

Project Design Phase-1

Solution Architecture

Date	04 - 10 - 2023
Team ID	NM2023TMID11301
Project Name	Block chain- Based Smart Real Management System

Solution Architecture:

Choose an appropriate blockchain platform, such as Ethereum, Binance Smart Chain, or a private blockchain, based on your specific needs.

Set up the blockchain network with nodes, consensus mechanisms, and smart contract deployment.

Implement user authentication and authorization, possibly using blockchain addresses for identity verification.

Ensure that user information remains private and secure.
